

## **Women's Wellness With Doctor Robinson Investment**

**60 Minutes (\$500)** - This is typically used for the initial intake visit, a space used to exchange information and ideas about the path to wellness and to formulate a plan, set in place testing and make preliminary recommendations for diet and lifestyle changes. This is also used to manage more complex patient's follow up visits with multiple lab results, or patients who wish to have additional time and space for idea exchange.

**30 Minutes (\$250)** - This visit is perfect for follow up of test results and recommendations for therapeutic interventions. Many patients find this visit suited for a quick check in 2-3 months out from the initial visit to tweak the treatment plan.

**90 Minutes (\$750)** - This visit is reserved for the patient who wishes to have multiple complex concerns addressed at the same visit, or would like to bring previous practitioner labs to visit for review. Please print labs prior to visit to save time.

Please be considerate of time constraints and respectful to other patients waiting for appointments. If you feel you need additional time for your appointment, be sure to schedule this at the time of your phone call to Kelly - 313-730-8880. Thank you !

Dearborn OB/Gyn is not affiliated with Women's Wellness with Dr. Robinson and the staff and billers are not available to answer questions related to this lab or medical practice billing. Thank you for understanding.
